Phil:

Thanks very much for your prompt reply. Actually all that Herman Millsap would need to send is a list of the complete official descriptive titles (names) of the permits. We don't need full and complete copies of the permits themselves. Could Herman send such a list? I would guess that such a list would probably fit on one or two pages.

Thanks again.

Alistair

I spoke to Herman Millsap today about copying the permits (without back up data). He indicated that reproduction time and mail would take approximately 1 week. The hard copies will be sent to me, and I will pass them on to PHE. There is not an option of electronic copies.

According to E-mail that I sent to HWAD on April 3, 2007, and the May 7 telecon, the current permits included water appropriations- potable and construction water, air quality, stormwater discharge, wastewater, water treatment, hazardous materials & hazardous waste, and solid waste disposal. Did I miss any? If so, please let me know and I will forward to Herman.

Phil:

Could you let me know if anything per below been received yet from HWAD? The information concerned is needed this week if possible.

Thank you.

Alistair

Mark:

Following up on the Hawthorne Depot conference call on applicable Army regulations that just ended, could you forward to me the email that Col. Green agreed to send to you, listing the air, water, etc., permits that are current to the Army operations at the Hawthorne Depot?

Thanks.

Alistair
